02 WORK COMPLETED

01	SECURITY · RISK REDUCED Applied routine security updates and verified the public site. Target: Main website Result: All updates completed without errors. Verified by: Checked the homepage, services page, and browser console after deployment. Client value: Reduced exposure to known software vulnerabilities.	Jun 4
02	PERFORMANCE · WORK COMPLETED Optimized large homepage images for faster delivery. Target: Homepage Result: Transferred image weight was reduced by 38%. Verified by: Compared production asset sizes before and after deployment. Client value: Visitors receive the main visual content faster.	Jun 12
03	CONTENT · ROUTINE VERIFICATION Published the revised summer services page. Target: Services page Result: The approved copy and links are live. Verified by: Reviewed the published page on desktop and mobile. Client value: Customers now see the current seasonal offering.	Jun 18
04	SUPPORT · ISSUE RESOLVED Resolved an issue affecting the contact details in the footer. Target: Site footer Result: The correct phone number now appears on every page. Verified by: Checked representative pages and both responsive breakpoints. Client value: Customers can reach the correct contact point.	Jun 25

03 OUTCOMES & VERIFICATION

- ✓ **Risk reduced**
Reduced exposure to known software vulnerabilities.
- ✓ **Issue resolved**
The incorrect contact details were corrected across the site.

04 RECOMMENDATIONS

- **Medium priority**
Review and refresh the portfolio photography next month.
Next action: Select six replacement images before the next maintenance window.

NEXT MONTH

Continue daily public-site checks and the monthly software, backup, security, and key-function reviews. Review the selected portfolio images during the next maintenance window.

CLOSING NOTE

Your website is in good shape. We will continue monitoring it and taking care of routine maintenance next month.
